Volume 35: Subject index

Abbreviations:—"(L)" refers to letters to the Editor.

Acetylcholinesterase and alphafetoprotein test results in neural-tube defect risk assessment for individual pregnancies, **1334**
Acidosis and severe megaloblastic anaemia, **984**
Actin. *See* Antiactin
Adamantinoma of long bones, clinical, pathological and ultrastructural features, **780**
Adenocarcinoma, pancreatic exocrine, site of origin of, significance of, **544**
Adenoma, parathyroid, coexisting with myelomatosis, hypercalcaemia due to, case of, **732**
Adenomas, colorectal, pathology of, colonoscopic survey of, **830**
Adenosine triphosphate metabolites, abnormal excretion in intrapartum hypoxia, relation to neurological assessment of damage, **999**
Adipose, fibroblastic and epithelial components, subcutaneous mixed tumour (thymolipoma?) with, case of, **1074**
Adrenal disease, micronodular (primary adrenal cortical dysplasia) causing Cushing's syndrome, light and electron microscopic study of case of, **1078**
Aerobic and anaerobic bacteria, velvet pad surface sampling of, evaluation with *in vitro* laboratory model, **1356**
—— —— —— bacteriology, swab transport method for, **555**
Affinity chromatography, human antiactin antibodies purified by, reaction against liver cells, **750**
Agar diffusion techniques for cotrimoxazole sensitivity testing, comparison of separate and combined disk methods (L), **583**
—— in sensitivity testing, failure of growth on (L), **1396**
Agar/paraffin wax, double embedding in, as aid to orientation of intestinal mucosal biopsies (L), **365**
Age and sex variation in fasting urinary hydroxyproline: creatinine ratio in normal adults, **807**
Alcoholic liver disease, circulating immune complexes and complement levels in, **380**
—— steatosis and cirrhosis, hepatitis B and A virus antibodies in, **693**
Alcoholism, serum glutamate dehydrogenase activity as marker of liver cell necrosis in, **207**
Alkaline phosphatase activity of neutrophils, relation to Fc-IgG receptor development in blood and bone marrow, **967**
—— —— and γ-glutamyltransferase in serum in rheumatoid arthritis, **638**; (L), **1395**
—— —— and horseradish peroxidase, double immunoenzyme labelling with, improved method for, **1092**
—— ——, calcium, and phosphate in plasma, measurements of, value in diagnosis of histological osteomalacia, **625**
Alphafetoprotein and acetylcholinesterase test results in neural-tube defect risk assessment for individual pregnancies, **1334**
Alpha-1-antitrypsin. *See* α_1-Antitrypsin
Aluminium, dialysis osteomalacia induced by (L), **792**
—— in bone tissue in renal osteodystrophy, localisation by histochemical methods and electron probe *x*-ray microanalysis, **1283**
Alveolar-cell carcinoma, sputum cytodiagnosis problems in, **1370**
Aminoglycosides, β-lactam antibiotics in combination with, assay of, **787**
Amylase. *See* Immunoglobulin-amylase complexes
Amyloid, differentiation from elastic fibres by Congo blue staining method, **789**
Amyloidosis, primary, diagnosis of, Ig distribution of bone marrow plasma cells as aid in, **285**
Anaemia, aplastic, *in vitro* colony formation by autologous bone marrow in, inhibitory effects of peripheral blood lymphocytes, and relation with response to immunosuppressive therapy, **1316**
——, dyserythropoietic, congenital, type III, clinical and haematological features, erythroblast abnormalities and nucleic acid synthesis in marrow cells in case of, **1103**
——, iron deficiency, during pregnancy, effect of total dose infusion of iron dextran on placental storage iron content in, **502**
——, megaloblastic, severe, and acidosis, **984**
——, sickle cell, occurrence of infection with parvovirus-like agent during 2-year period in children with, **744**
Anaerobes, isolation from simulated paediatric blood cultures, comparison of homemade blood culture broth with papain liver digest with commercial media for, **1142**
Anaerobic and aerobic bacteria, velvet pad surface sampling of, evaluation with *in vitro* laboratory model, **1356**
—— —— —— bacteriology, swab transport method for, **555**
—— cabinets, Anotox as atmospheric detoxifying agent for, appraisal of, **233**
—— incubator for isolation of anaerobes from clinical samples, comparison with standard jars, **1158**
—— infections, diagnosis of, direct gas-liquid chromatography of clinical samples in, 3-year experience of, **709**
Androgens, 17α-alkylated (danazol and stanazolol), treatment with, effect on C4 conversion products in hereditary angioedema studied by crossed immunoelectrophoresis, **728**
Angiodysplasias of colon, **824**
Angioedima, hereditary, C4 conversion products in, effect of treatment with 17α-alkylated androgens (danazol and stanazolol) studied by crossed immunoelectrophoresis, **728**
Anotox as atmospheric detoxifying agent for anaerobic cabinets, appraisal of, **233**
Antiactin antibodies, human, purified by affinity chromatography, reaction against liver cells, **750**
Antibiotic management of case of recurrent *Streptococcus bovis* septicaemia, value of minimum bactericidal concentration in, **879**
—— therapy in acute leukaemia, serum C-reactive protein level as guide to, **866**
Antibiotics in culture medium for isolation of *Gardnerella vaginalis* in non-specific vaginitis, comparison with microscopy, **550**
——, β-lactam, in combination with aminoglycosides, assay of, **787**
——, sensitivity test data, collection and analysis of, microcomputer system for, **444**
——, susceptibility testing trial in UK External Quality Assessment Scheme, **1169**
Antibodies, antiactin, human, purified by affinity chromatography, reaction against liver cells, **750**
——, anticoagulant, in synovial membranes in haemophilia, rheumatoid arthritis and other rheumatic disorders, **673**
——, antinuclear, systemic lupus erythematosus with high DNA-binding capacity but lacking, incidence of, **1118**
——, complement fixing, against *Mycoplasma pneumoniae*, false-positive, in bacterial meningitis (L), **903**
——, IgA, to mumps virus in serum, detection of, ELISA for, **1129**
——, ——, to varicella zoster virus, determination by

immunoperoxidase assay, **645**
——, IgG, cytomegalovirus-specific, detection of, comparison of ELISA, radioimmunoassay, complement fixation, anticomplement immunofluorescence and passive haemagglutination for, **1345**
——, liver membrane. *See* Liver membrane (auto)antibodies
——, monoclonal, for histopathological diagnosis of malignancy, **1253**
——, ——, in identification of surface antigens on fixed cells (L), **1295**
——, ——, in immunocytochemical identification of breast carcinoma cells in effusions (L), **1037**
——, ——, to tumours, review of, **369**
——, —— (3C4), neutrophil granulocytic cell antigen defined by, distribution within nornmal haemic and non-haemic tissue, **959**
——, syphilis, screening system in blood transfusion centre for, modification using minaturised *Treponema pallidum* haemagglutination assay, **1349**
—— to *Aspergillus fumigatus* in serum, detection of, rapid ELISA for, **1134**
—— to *Chlamydia trachomatis,* detection of, ELISA with chlamydial group antigen for, development and evaluation of, **1122**
—— to DNA, detection of, ELISA method for, **566**
—— to hepatitis B and A virus in alcoholic steatosis and cirrhosis, **693**
—— to *Legionella pneumophila,* detection of, ELISA test for, **657**
—— to smooth muscle and to measles virus in sera in chronic active hepatitis, lack of cross-reactivity between, **1388**
—— to soya protein in coeliac disease, occurrence and possible relevance, **319**
—— to tetanus, immune, manual screening with latex coated with tetanus toxoid for, **899**
—— —— —— toxoid, detection of, comparison of direct haemagglutination method with radioimmunoassay for, **1138**
—— to *Toxoplasma gondii,* detection in sera, comparative study of 3 tests (Toxotest-MT latex agglutination test, dye test, indirect haemagglutination test), **228**
Antibody class capture and ELISA for detection of antitoxoplasma IgM, development and use in toxoplasmic lymphadenopathy, **892**
Anticoagulant antibodies in synovial membranes in haemophilia, rheumatoid arthritis and other rheumatic disorders, **673**
—— therapy, oral, standardisation in laboratory control of, BCR/ICSH reference materials for (L), **1395**
Anticomplement immunofluorescence, ELISA, radioimmunoassay, complement fixation and passive haemagglutination for detection of cytomegalovirus IgG antibody, comparison of, **1345**
Antigammaglobulins, fluorescein-conjugated, replacement by FITC-protein A in indirect immunofluorescent antibody test for virus infections, **472**
Antigens, blood group, in gastric mucosa, immunocytochemistry of (L), **245**
——, carcinoembryonic, plasma levels, and immunohistochemical patterns of epithelial marker antigens in large bowel carcinoma, **922**
——, cryptococcal, in cerebrospinal fluid, false positive latex tests for (L), **244**
——, heat-killed, polyvalent, for diagnosis of *Legionella pneumophila* infection by indirect fluorescent antibody test, **434**
——, hepatitis B, detection in paraffin sections of liver, orcein in, **430**
—— on neutrophil granulocytes defined by monoclonal antibody (3C4), distribution within normal haemic and non-haemic tissue, **959**
——, surface, on fixed cells, identification with monoclonal antibodies (L), **1295**
——, yolk sac, formolised, in diagnosis of *Legionella pneumophila* infections, **211**; *Erratum,* **692**
——, —— ——, ——, in indirect fluorescent antibody test for early diagnosis of Legionnaires' disease due to *Legionella pneumophila* serogroup 1 (L), **791**
Antimicrobial synergism, reciprocal, between *Escherichia coli* and *Bacteroides fragilis* in presence of metronidazole, **1150**
Antinuclear antibodies, systemic lupus erythematosus with high DNA-binding capacity but lacking, incidence of, **1118**
Antisera in fluorescent antibody test for detection of *Bacteroides* spp in clinical specimens, comparison of, **304**
Antitetanus antibodies, immune, manual screening with latex coated with tetanus toxoid for, **899**
Antithrombin III and fibrinogen degradation product (fragment E) in diabetic nephropathy, **661**
Antitoxoplasma IgM, detection of, ELISA and antibody class capture for, development and use in toxoplasmic lymphadenopathy, **892**
α_1-Antitrypsin phenotypes in malignant lymphoma, **1213**
API Staph micromethod gallery for identification of staphylococci and micrococci, evaluation of, **650**
API-20 STREP system for identification of streptococci, evaluation of, **468**
—— —— —— in isolation of *Streptococcus milleri,* evaluation of (L), **1297**
Araldite-embedded tissues, demonstration of immunoproteins in, **111**; (L), **904**
Argyrophil staining with double silver impregnation technique in histological demonstration of platelet thrombi, **1032**
Arrhythmia and dyspnoea with myocardial haemorrhage in case of thrombocytopenia, **858**
Arthritis, rheumatoid, serum γ-glutamyltransferase and alkaline phosphatase in, **638**; (L), **1395**
——, septic, and osteomyelitis, due to *Kingella kingae,* **219**
—— ——, diagnosis and management of, synovial fluid lactic acid measurement in, **390**
Ascorbate status and fibrinogen levels after acute cerebrovascular accidents, **195**
Ascorbic acid deficiency, effect on serum ferritin levels in β-thalassaemia major and iron overload, **487**
Aspergillus fumigatus, antibodies in serum to, detection of, rapid ELISA for, **1134**
Aspiration biopsy, fine-needle, 'cell-block' technique for, **688**
—— ——, ——, segmental lymph node infarction after, **855**
Association of Clinical Biochemists: Reports and Bulletins, **58, 222, 356, 438, 516, 624**
Atherosclerotic intermittent claudication, platelet inhibition with Ticlopidine in, trial of, **740**
Australian and New Zealand survey of paediatric bilirubin analyses, and regional survey of direct spectrophotometric methods, 52; (L), **901**
Autoantibodies, liver membrane. *See* Liver membrane (auto) antibodies
Autoimmune process in case of hyperplastic parathyroidism, evidence of, **812**
Automated head-space capillary gas chromatography in diagnosis of bacteraemia, **715**
—— image analysis for measurement of liver iron overload, comparison with biochemical and histological methods, **45**
—— laboratory equipment, decontamination of (L), **580**
Autopsies, maternal, determination of cause of death in, review of procedures, **909**

B and T cells in effusions as markers for non-Hodgkin's lymphoma, **1216**
Bacteraemia, diagnosis by automated head-space capillary gas chromatography, **715**
Bacteria, anaerobic and aerobic, velvet pad surface sampling of, evaluation with *in vitro* laboratory model, **1356**
——, ——, isolation from clinical specimens, comparison of anaerobic incubator with standard jars for, **1158**
——, antibiotic sensitivity test data, collection and analysis of, microcomputer system for, **444**

—— of upper respiratory tract, isolation of, evaluation of swabs and swab-transport media kits in, **223**
——, specific, detection of, failure of direct gas-liquid chromatography of clinical samples in, **706**
——. *See also* Enterobacteria
Bacterial bronchopneumonia, successfully treated, reaction of granulocyte system in, **77**
—— meningitis, false-positive complement fixing antibodies against *Mycoplasma pneumoniae* in (L), **903**
Bacteriocin typing, potential in study of *Clostridium perfringens* food poisoning, **1361**
Bacteriological. *See* Microbiological
Bacteriology, aerobic and anaerobic, swab transport method for, **555**
——, clinical. *See* Clinical bacteriology
—— laboratory proficiency testing system in Ontario Province, organisation and impact of, **94**
Bacteriuria, detection by bioluminescence, evaluation of Lumac kit for, **107**
—— in patients undergoing prostatectomy, **1185**
Bacteroides spp detection in clinical specimens, fluorescent antibody test for, comparison of antisera in, **304**
Bacteroides fragilis and *Escherichia coli*, reciprocal antimicrobial synergism in presence of metronidazole between, **1150**
—— ——, *in vitro* responses to Moxalactam, Cefotaxime, Cefmetazole, Josamycin and erythromycin (L), **1166**
—— *ureolyticus (B corrodens)*, isolation from clinical infections, **309**
BCR/ICSH reference materials for standardisation in laboratory control of oral anticoagulant therapy (L), **1395**
Beryllium hypersensitivity, detection of, comparison of lymphocyte transformation and macrophage migration inhibition tests in, **684**
Beta-haemolytic. *See* β-Haemolytic
Bile acids, serum levels, influence of gallbladder, **754**
Biliary cirrhosis, primary, extrahepatic malignancies in, increased incidence in survey of 85 patients, **541**
Bilirubin analyses, paediatric, Australian and New Zealand survey, and regional survey of direct spectrophotometric methods, **52**; (L), **901**
Biochemical and haematological parameters in Saudi blood donors, study of reference values for, **69**
—— and histological methods for measurement of liver iron overload, comparison with automated image analysis, **45**
—— assessment of histochemical methods for oestrogen receptor localisation, **401**
—— profiles of 24 500 patients, incidence of hypercalcaemia and primary hyperparathyroidism in, **395**
Biochemistry, clinical. *See* Clinical biochemistry
Bioluminescence, Lumac kit for detection of bacteriuria by, evaluation of, **107**
Biopsies, bone marrow, in haematological disorders, **257**
——, intestinal mucosal, orientation of, double embedding in agar/paraffin wax as aid to (L), **365**
——, upper gastrointestinal, in Crohn's disease of ileum and colon, morphological and immunohistochemical findings in, **934**
Biopsy, aspiration, fine-needle, 'cell-block' technique for, **688**
——, ——, ——, segmental lymph node infarction after, **855**
——, bone marrow, needle with core securing device for, **359**
——, ——, specimens, processing without decalcification by cryofracture technique for transmission and scanning electron microscopy, **240**; *Erratum*, **904**
——, breast, specimens, mammographic abnormalities in, histological localisation of, **1163**
——, liver, needles for, comparison of Trucut and Surecut types, **761**
——, rectal, diagnosis of inflammatory bowel disease from, medical audit of, **341**; (L), **476**
Biotyping of *Enterobacter cloacae*, **875**
—— system for differentiation of *Escherichia coli* strains, **1366**
Bladder tumours, low grade and high grade, morphometric analysis of urothelial cells in voided urine in, **1063**
Blood and bone marrow, relation of neutrophil alkaline phosphatase activity to Fc-IgG receptor development in, **967**
—— cell counters. *See* Coulter counter
——, cells derived from, in bone marrow transplantation, ratio to marrow-derived cells, **492**
—— culture broth, homemade, with papain liver digest for isolation of anaerobes from simulated paediatric blood cultures, comparison with commercial media, **1142**
—— ——, Fastidious Anaerobe Broth compared with other media for, **458**
—— donors, Israeli, IgA deficiency in (L), **582**
—— ——, Saudi, haematological and biochemical parameters in, study of reference values for, **69**
—— ——, voluntary, salicylate screening in sera of, 2 analytical methods, **59**
—— group antigens in gastric mucosa, immunocytochemistry of (L), **245**
—— lymphocytes, peripheral, inhibitory effects on *in vitro* colony formation by autologous bone marrow in aplastic anaemia, and relation with response to immunosuppressive therapy, **1316**
——, peripheral, samples sent by post, cytogenetic study in acute myeloid leukaemia with, **861**
—— platelet(s). *See* Platelet(s)
—— poor in leucocytes, production of, comparative study of Fenwal and Pall microaggregate filters in, **681**
Body fluids, proteins in, measurement by polyacrylamide gel electrophoresis, **1328**
Bone histology, quantitative, in 38 patients with advanced renal failure, **125**
—— marrow and blood, relation of neutrophil alkaline phosphatase activity to Fc-IgG receptor development in, **967**
—— ——, autologous, *in vitro* colony formation in aplastic anaemia by, inhibitory effects of peripheral blood lymphocytes, and relation with response to immunosuppressive therapy, **1316**
—— —— biopsies in haematological disorders, **257**
—— —— biopsy needle with core securing device, **359**
—— —— —— specimens, processing without decalcification by cryofracture technique for transmission and scanning electron microscopy, **240**; *Erratum*, **904**
—— —— cells, nucleic acid synthesis in, and erythroblast abnormalities in case of congenital dyserythropoietic anaemia type III, **1103**
—— ——, cryostat sections of, enzyme histochemical analysis on, **1220**
—— —— plasma cells, Ig distribution in, as diagnostic aid for primary amyloidosis, **285**
—— —— processing and cryopreservation, **186**
—— —— transplantation, ratio of blood- and marrow-derived cells in, **492**
——, Paget's disease of, osteoclasts from, ultrastructural features related to viral aetiology, **771**
—— tissue aluminium in renal osteodystrophy, localisation by histochemical methods and electron probe *x*-ray microanalysis, **1283**
Bones, long, adamantinoma of, clinical, pathological and ultrastructural features, **780**

Brain Heart Infusion, *Neisseria gonorrhoeae* growth in (L), **119**
Breast biopsy specimens, mammographic abnormalities in, histological localisation of, **1163**
——, carcinoma of, elastosis measurement in, prognostic value of (L), **245**
—— —— ——, cells, immunocytochemical identification in effusions with monoclonal antibody (L), **1037**
Bronchopneumonia, bacterial, successfully treated, reaction of granulocyte system in, **77**
Buffy coat microscopy for early diagnosis of meningococcal septicaemia, evaluation of (L), **691**

C1q purification by DNA precipitation followed by ion exchange and lectin affinity chromatography, **1114**
C4 conversion products in hereditary angioedema, effect of treatment with 17α-alkylated androgens (danazol and stanazolol) studied by crossed immunoelectrophoresis, **728**
Cabinets, anaerobic, Anotox as atmospheric detoxifying agent for, appraisal of, **233**
——, safety, microbiology, class 1, disinfection with formaldehyde, problems in, **698**
Calcification fronts in chronic renal failure, demonstration by *in vivo* and *in vitro* tetracycline labelling, **1278**
Calcium, phosphate, and alkaline phosphatase in plasma, measurements of, value in diagnosis of histological osteomalacia, **625**
Calculi, urinary cytology in patients with, **350**
Campylobacter jejuni/coli, isolation from faeces, selective (Preston) medium compared with Skirrow's medium for, **462**; (L), **1036**
Canada (Ontario Province), bacteriology laboratory proficiency testing system, organisation and impact of, **94**
Candida albicans serotypes, frequency in patients with denture-induced stomatitis, comparison with normal denture wearers, **888**
Carbohydrates in tissue, identification by use of lectins, **239**
Carboxyhaemoglobin as reference material for haemoglobin assay, **292**
Carcinoembryonic antigen, plasma levels, and immunohistochemical patterns of epithelial marker antigens in large bowel carcinoma, **922**
Carcinoid, pulmonary, associated with primary endocrine carcinoma of parotid salivary gland, **611**
Carcinoma, alveolar-cell, sputum cytodiagnosis problems in, **1370**
——, endocrine, primary, of parotid salivary gland associated with lung carcinoid, **611**
——, gastric, cytological diagnosis of, morphological characteristics and distribution patterns of epithelial cells in, **585**
—— of breast, cells, immunocytochemical identification in effusions with monoclonal antibody (L), **1037**
—— —— ——, elastosis measurement in, prognostic value of (L), **245**
—— of large intestine, plasma CEA levels and immunohistochemical patterns of epithelial marker antigens in, **922**
——, pulmonary, morphological diagnosis in respiratory medicine department, analysis of accuracy, **414**; (L), **1167**
——, renal cell, basic isoferritin and hypercalcaemia in, **1008**
——, urinary cyclic GMP in, levels compared with other conditions and potential as marker for cancer treatment, **800**
——. *See also* Malignancy; Neoplasia
Cardiolipin test for serological detection of early primary syphilis, comparison with TPHA (L), **1394**
Catheterisation, suprapubic, isolation of *Pseudomonas fluorescens* after (L), **581**
Cefotaxime, Moxalactam, Cefmetazole, Josamycin and erythromycin, *in vitro* responses of *Bacteroides fragilis* to (L), **1166**
Celloidin bag for histological preparation of cytological material, **574**; *Erratum*, **904**
Cells, fixed, surface antigens on, identification with monoclonal antibodies (L), **1295**
——, sequential light and scanning electron microscopy of, method using localising microcoverslips for, **576**
——, size of, measurement of, flexible microprocessor system for, **620**
——, structure and percent viability, assessment by slide centrifuge (Cytospin) technique, **191**
Centrifugation method, differential, for platelet counting, **114**
Centrifuge, slide (Cytospin), technique using, for assessment of cell structure and percent viability, **191**
Cephalosporins, sensitivity tests, **1177**
Cerebrospinal fluid and plasma inorganic ions and glucose in chronic renal failure, relations between, **631**
—— ——, cryptococcal antigen in, false positive latex tests for (L), **244**
—— —— lymphoma cells confirmed by chromosome analysis, **1307**
Cerebrovascular accidents, acute, ascorbate status and fibrinogen levels after, **195**
Cervical cells, exfoliated, Feulgen-hydrolysis profiles of DNA in, as

aid in diagnosis of malignancy, **345**
—— intraepithelial neoplasia, review of, **1**; *Erratum*, **478**
Chediak-Higashi syndrome, distribution pattern of fibroblast lymosomal granules in, **496**
Chemotaxis, granulocyte, multiple assay screening with 'raft' technique for, **182**
Chlamydia, culture of (L), **365**
Chlamydia psittaci and *C. trachomatis* inclusions, staining method for, **642**
—— *trachomatis*, antibodies to, detection of, ELISA with chlamydial group antigen for, development and evaluation of, **1122**
—— ——, not cause of acute gastroenteritis in young children (L), **1036**
Cholecystokinin. *See* Secretin-cholecystokinin
Chromatography, affinity, human antiactin antibodies purified by, reaction against liver cells, **750**
——, gas, head-space, automated, with capillary column, in diagnosis of bacteraemia, **715**
——, gas-liquid, direct, of clinical samples, failure to detect specific organisms, **706**
——, ——, ——, —— —— —— in diagnosis of anaerobic infections, 3-year experience of, **709**
——, lectin affinity, and ion exchange after DNA precipitation in purification of C1q, **1114**
Chromosome analysis confirming lymphoma cells in CSF, **1307**
Ciliary ultrastructure, nasal brushing for study of, **357**
Cirrhosis and steatosis, alcoholic, hepatitis B and A virus antibodies in, **693**
——, biliary, primary, extrahepatic malignancies in, increased incidence in survey of 85 patients, **541**
——, monocyte function in, **972**
Claudication, intermittent, atherosclerotic, platelet inhibition with Ticlopidine in, trial of, **740**
Clinical bacteriology, microcomputer system for, 12 months' trial of, **881**
—— biochemistry test request form, requirements for, **986**
—— pathologists, recruitment problems, changing status and future prospects, **249**
Clostridium difficile and cytotoxin in routine faecal specimens, **561**
—— *perfringens* food poisoning, potential of bacteriocin typing in study of, **1361**
Coalmine explosion at Golborne Colliery (L), **478**
Coeliac disease in childhood, histological criteria for (L), **1166**
—— ——, increased histamine tissue levels in duodenal mucosa of children with, **596**
—— ——, soya protein antibodies in, occurrence and possible relevance, **319**
Colchicine sensitivity test in differential diagnosis of chronic lymphocytic leukaemia and B lymphocytic lymphoma, comparison with mouse red cell rosette formation, **376**
Colitis, collagenous, case treated with mepacrine hydrochloride, **338**
——, ulcerative, mucosal functional activity in, luminal ions and short chain fatty acids as markers of, **323**
Collagenous colitis case treated with mepacrine hydrochloride, **338**
Colon and ileum, Crohn's disease of, morphological and immunohistochemical findings in upper gastrointestinal biopsies in, **934**
——, angiodysplasias of, **824**
Colonic mucosa, functional activity in ulcerative colitis, luminal ions and short chain fatty acids as markers of, **323**
Colorectal adenomas, pathology of, colonoscopic survey of, **830**
—— neoplasia, secretory immunoglobulin system in, immunoperoxidase study of, **14**
Complement fixation, ELISA, radioimmunoassay, anticomplement immunofluorescence and passive haemagglutination for detection of cytomegalovirus IgG antibody, comparison of, **1345**
—— fixing antibodies against *Mycoplasma pneumoniae*, false-positive, in bacterial meningitis (L), **903**
—— levels and circulating immune complexes in alcoholic liver disease, **380**
Computed tomography lung images, pathological evaluation of, **536**
Computer programs in histopathology record keeping, **40**
—— technique, interactive, in morphometric study of liver cell nuclear size and shape in hepatomas, **1057**
Computer-aided microscopy, interactive, in measurement of striated muscle fibre diameters, **1268**
Concanavalin A, serum ferritin binding to, in iron overload and chronic liver disease, **481**
Congo blue for staining of elastic fibres and differentiation from amyloid, **789**
Continuous ambulatory peritoneal dialysis, peritonitis in patients undergoing, laboratory diagnosis of, **1181**
Corrections, **796, 904, 1038, 1168**
Cotrimoxazole sensitivity testing, comparison of separate and combined disk agar diffusion techniques for (L), **583**
Coulter counter, Model S Plus Phase II, in estimation of lymphocyte percentage and number, **1194**
C-reactive protein, serum level as guide to antibiotic therapy in acute leukaemia, **866**
Creatine kinase, circulating CK-MB and CK-BB isoenzymes after gastrointestinal surgery, **200**
—— ——, total CK activity and isoenzyme patterns in normal and neoplastic gastrointestinal tissue, **204**
—— phosphokinase tetrazolium test in macroscopic histochemical detection of myocardial infaction, artefactual nature of, **407**
Creatinine: hydroxyproline ratio, urinary, fasting, measurement in normal adults and variation with age and sex, **807**
Crohn's disease of ileum and colon, morphological and immunohistochemical findings in upper gastrointestinal biopsies in, **934**
Cryofracture technique for processing bone marrow biopsy specimens without decalcification for transmission and scanning electron microscopy, **240**; *Erratum*, **904**
Cryopreservation and processing of bone marrow, **186**
——, platelet morphological and functional disturbances induced by, **870**
Cryostat sections of bone marrow, enzyme histochemical analysis on, **1220**
Cryptococcal antigen in cerebrospinal fluid, false positive latex tests for (L), **244**
Culture medium with antibiotics for isolation of *Gardnerella vaginalis* in non-specific vaginitis, comparison with microscopy, **550**
Cushing's syndrome, micronodular adrenal disease causing, light and electron microscopic study of case of, **1078**
Cyanide, NAD and PMS as additives to NBT-dehydrogenase test in macroscopic histochemical detection of myocardial infarction, **410**
Cystic fibrosis, diagnostic value of serum pancreatic isoamylase and immunoreactive trypsin measurement in, comparison of, **547**
Cytochemical and immunological analysis of 3 cases of malignant histiocytosis of intestine, **510**
Cytodiagnosis from sputum, problems in alveolar-cell carcinoma, **1370**
—— of gastric cancer, morphological characteristic and distribution patterns of epithelial cells in, **585**
Cytogenetic study in acute myeloid leukaemia with peripheral blood samples sent by post, **861**
Cytological material, histological preparation of, celloidin bag for, **574**; *Erratum*, **904**
Cytology, urinary, in patients with calculi, **350**
Cytomegalovirus and herpes simplex virus disease after renal transplanation, prospective study, **1190**
Cytomegalovirus-specific IgG antibody, detection of, comparison of ELISA, radioimmunoassay, complement fixation, anticomplement immunofluorescence and passive haemagglutination for, **1345**
Cytopenias, bone marrow biopsies in, **260**

Data processing. *See* Word processor
Decalcification, influence on immunohistochemical staining of formalin-fixed paraffin-embedded tissue, **1392**
Decontamination of automated laboratory equipment (L), **580**
Dentures, stomatitis induced by, frequency of *Candida albicans* serotypes in patients with, comparison with normal denture wearers, **888**
Deoxyribonucleic acid. *See* DNA
Dermatophyte infections, significance of, clinical and laboratory study in 640 dermatology outpatients, **313**
Dextran sulphate in ELISA for immune complexes for inhibition of direct binding of anti-IgG enzyme conjugate to solid-phase C1q (L), **581**
Diabetic nephropathy, antithrombin III and fibrinogen degradation product (fragment E) in, **661**
Dialysis. *See* Continuous ambulatory peritoneal dialysis; Haemodialysis
Digital fibroma, recurring, **849**
2, 3-Diphosphoglyceric acid, possible diurnal variation in (L), **476**
Disc technique for presumptive identification of *Legionella pneumophila*, **1353**
Disinfection of class 1 microbiology safety cabinets with formaldehyde, problems in, **698**
—— of fibrescopes, buffered hypochlorite solution for, **296**
DNA antibodies, detection of, ELISA method for, **566**
——, Feulgen-hydrolysis profiles in exfoliated cervical cells as aid in diagnosis of malignancy, **345**
—— precipitation followed by ion exchange and lectin affinity chromatography in purification of C1q, **1114**
DNA-binding capacity, high, systemic lupus erythematosus lacking antinuclear antibodies but with, incidence of, **1118**
Duodenal mucosa, histamine tissue levels, increase in children with coeliac disease, **596**
Duodenum, heterotopic gastric mucosa in, **591**
Dyserythropoietic anaemia, congenital, type III, clinical and haematological features, erythroblast abnormalities and nucleic acid synthesis in marrow cells in case of, **1103**
Dysfibrinogenaemia, acquired, in liver disease, **667**
Dyspnoea and arrhythmia with myocardial haemorrhage in case of thrombocytopenia, **858**

Effusion fluids, T and B cells in, as markers for non-Hodkin's lymphoma, **1216**
Elastic fibres, staining and differentiation from amyloid by Congo blue method, **789**
Elastosis measurement in breast carcinoma, prognostic value of (L), **245**
Electron and light microscopic study of case of micronodular adrenal disease causing Cushing's syndrome, **1078**
—— microscopy for diagnosis of rotavirus infection, comparison with ELISA and SPACE, **104**
—— ——, scanning, and preceding light microscopy of cells, method using localising microcoverslips for, **576**
—— ——, ——, preparation of Epon-embedded renal tissue for, **1384**
—— ——, transmission and scanning, processing of bone marrow biopsy specimens without decalcification by cryofracture technique for, **240**; *Erratum*, **904**
—— probe *x*-ray microanalysis and histochemical methods in localisation of bone tissue aluminium in renal osteodystrophy, **1283**
Electron/light microscope, combined (LEM 2000), in routine surgical histopathology, **425**
Electrophoresis, polyacrylamide gel, in measurement of body fluid proteins, **1328**
ELISA. *See* Enzyme-linked immunosorbent assay
Endocrine carcinoma, primary, of parotid salivary gland associated with lung carcinoid, **611**
Endothelial fenestrations, glomerular, diaphragms present in? (L), **1035**
Enterobacter cloacae, biotyping of, **875**
Enterobacteria resistant to gentamicin, carriage and infection, comparative study of persistence of, **452**
Enteropathy, gluten-sensitive, diagnosis of, predictive value of raised mitotic indices of jejunal epithelial lymphocytes in, **517**
Enzyme histochemical analysis on cryostat sections of bone marrow, **1220**
—— histochemistry, macroscopic, in myocardial infarction, **407**, **410**
Enzyme-linked immunosorbent assay and antibody class capture for detection of antitoxoplasma IgM, development and use in toxoplasmic lymphadenopathy, **892**
—— —— —— for detection of antibodies to *Legionella pneumophila*, **657**
—— —— —— —— —— of IgA antibodies to mumps virus in serum, **1129**
—— —— —— for diagnosis of recent rubella infection, **101**
—— —— —— —— —— of rotavirus infection, comparison with SPACE and electron microscopy, **104**
—— —— —— for immune complexes, dextran sulphate for inhibition of direct binding of anti-IgG enzyme conjugate to solid-phase C1q in (L), **581**
—— —— —— in serological characterisation of *Ureaplasma urealyticum* strains, **439**
—— —— —— method for detection of DNA antibodies, **566**
—— —— ——, radioimmunoassay, complement fixation, anticomplement immunofluorescence and passive haemagglutination for detection of cytomegalovirus IgG antibody, comparison of, **1345**
—— —— ——, rapid, for detection of *Aspergillus fumigatus* antibodies in serum, **1134**
—— —— —— with chlamydial group antigen for detection of antibodies to *Chlamydia trachomatis*, development and evaluation of, **1122**
Epithelial, adipose and fibroblastic components, subcutaneous mixed tumour (thymolipoma?) with, case of, **1074**
—— cells, morphological characteristics and distribution patterns of, in cytological diagnosis of gastric cancer, **585**
—— marker antigens, immunohistochemical patterns of, and plasma CEA levels in large bowel carcinoma, **922**
Epon-embedded renal tissue, preparation for scanning electron microscopy, **1384**
Erythroblast abnormalities and nucleic acid synthesis in marrow cells in case of congenital dyserythropoietic anaemia type III, **1103**
Erythrocyte, leucocyte and platelet size distribution curve analysis, ICSH recommendations for, **1320**
—— rosette formation, mouse, in differential diagnosis of chronic lymphocytic leukaemia and B lymphocytic lymphoma, comparison with colchicine sensitivity test, **376**
—— sedimentation rate, photographic recording with Lee Sedimentometer (L), **243**
Erythrocytes, coupled, solid phase aggregation of, for diagnosis of rotavirus infection, comparison with ELISA and electron microscopy, **104**
Erythromycin, Moxalactam, Cefotaxime, Cefmetazole and Josamycin, *in vitro* responses of *Bacteroides fragilis* to (L), **1166**
Escherichia coli and *Bacteroides fragilis*, reciprocal antimicrobial synergism in presence of metronidazole between, **1150**
—— —— strains, differentiation of, biotyping system for, **1366**

Fibrinogen degradation product (fragment E) and antithrombin III in diabetic nephropathy, **661**
—— levels and ascorbate status after acute cerebrovascular accidents, **195**
Fibroblastic, adipose and epithelial components, subcutaneous mixed tumour (thymolipoma?) with, case of, **1074**
Fibroblasts, lymosomal granules in, distribution pattern in Chediak-Higashi syndrome, **496**
Fibroma, digital, recurring, **849**
—— of tendon sheath, **842**
Fibronectin in exudative pleural effusions, **723**
Fine-needle aspiration biopsy, 'cell-block' technique for, **688**
—— —— ——, segmental lymph node infarction after, **855**
Finland, urinary pathogen resistance to trimethoprim in (L), **117**
FITC-protein A replacement of fluorescein-conjugated antigammaglobulins in indirect immunofluorescent antibody test for virus infections, **472**
Fluids, biological, isolation of particles from, ferrography for, **689**
——. *See also* Body fluids
Fluorescein-dilaurate test for pancreatic exocrine function, prospective comparison with secretin-cholecystokinin test, **1240**
Fluorescent antibody test, failure to identify penicillinase-producing *Neisseria gonorrhoeae* strains, **215**
—— —— —— for detection of *Bacteroides* spp in clinical specimens, comparison of antisera in, **304**
—— —— ——, indirect, in diagnosis of *Legionella pneumophila* infection, polyvalent heat-killed antigen for, **434**
—— —— ——, ——, with formolised yolk sac antigens for diagnosis of *Legionella pneumophila* infections, **211**; Erratum, **692**
—— —— ——, ——, —— —— —— —— —— in early diagnosis of Legionnaires' disease due to *Legionella pneumophila* serogroup 1 (L), **791**
Food poisoning with *Clostridium perfringens*, potential of bacteriocin typing in study of, **1361**
Formaldehyde disinfection of class 1 microbiology safety cabinets, problems in, **698**
Formalin-fixed paraffin-embedded tissue, immunohistochemical staining of, influence of decalcification, **1392**
France (Finistère), monoclonal gammopathies in adult population of, **63**

Gallbladder, influence on serum bile acids, **754**
Gamma-glutamyltransferase. *See* γ-Glutamyltransferase
Gammopathies, monoclonal, in adult population of Finistère, France, **63**
Gardnerella vaginalis isolation in non-specific vaginitis, comparison of culture medium with antibiotics and microscopy for, **550**
Gas apparatus for post-mortem lung inflation and fixation, modification of, **1294**
—— chromatography, head-space, automated, with capillary column, in diagnosis of bacteraemia, **715**
Gas-liquid chromatography, direct, of clinical samples, failure to detect specific organisms, **706**
—— ——, ——, —— —— —— in diagnosis of anaerobic infections, 3-year experience of, **709**
Gastric carcinoma, cytological diagnosis of, morphological characteristics and distribution patterns of epithelial cells in, **585**
—— mucosa, blood group antigens in, immunocytochemistry of (L), **245**
—— ——, heterotopic, in duodenum, **591**
Gastritis, 5-year follow-up study of, **757**
Gastroenteritis, acute, in young children, *Chlamydia trachomatis* not cause of (L), **1036**
Gastrointestinal surgery, circulating CK-MB and CK-BB isoenzymes after, **200**
—— tissue, normal and neoplastic, total creatine kinase activity and isoenzyme patterns in, **204**
—— tract, upper, biopsies in Crohn's disease of ileum and colon, morphological and immunohistochemical findings in, **934**
Gene exchange and transformation of oral Neisseria in gonorrhoea, evidence for, **1153**
Gentamicin, enterobacteria resistant to, carriage and infection, comparative study of persistence of, **452**
Glomerular endothelial fenestrations, diaphragms present in? (L), **1035**
Glucose and inorganic ions in CSF and plasma in chronic renal failure, relations between, **631**
Glutamate dehydrogenase activity in serum as marker of liver cell necrosis in alcoholics, **207**
γ-Glutamyltransferease and alkaline phosphatase in serum in rheumatoid arthritis, **638**; (L), **1395**
Glutaraldehyde fixation, human intestinal mucosal mast cells after, staining properties of, **897**
Gluten-sensitive enteropathy, diagnosis of, predictive value of raised mitotic indices of jejunal epithelial lymphocytes in, **517**
Glycocholic acid, serum levels, radioimmunoassay of, comparison with standard liver function tests and liver biopsy findings in children with liver disease, **1011**
Golborne Colliery, explosion at (L), **478**
Gonadoblastoma/dysgerminoma, bilateral, in 46 XY patient, case report with hormonal studies, **420**
Gonorrhoea, gene exchange and transformation of oral Neisseria in, evidence for, **1153**
Granulocyte chemotaxis, multiple assay screening with 'raft' technique for, **182**
—— system, reaction in successfully treated bacterial bronchopneumonia, **77**
Granulocytes, neutrophil, antigen defined by monoclonal antibody (3C4) on, distribution within normal haemic and non-haemic tissue, **959**
Granulocytic leukaemia, chronic, and multiple myeloma, simultaneous presentation of (L), **364**
Granuloma, midline, lethal, malignant histiocytosis of nose presenting as, intestinal villous atrophy with crypt hyperplasia in, **606**
——, ——, ——, —— —— presenting as, nasal biopsy findings in, **599**
Granulomatous mastitis, 7 cases of, **941**
Guanosine 3′, 5′ monophosphate, cyclic, in urine, levels in cancer and other conditions and potential as marker for cancer treatment, **800**

Haemagglutination, direct method, for detection of antibodies to tetanus toxoid, comparison with radioimmunoassay, **1138**
——, passive, ELISA, radioimmunoassay, complement fixation and anticomplement immunofluorescence for detection of cytomegalovirus IgG antibody, comparison of, **1345**

——, *Treponema pallidum*, for serological detection of early primary syphilis, comparison with cardiolipin test (L), **1394**
——, —— ——, miniaturised, in modification of screening system for antisyphilis antibodies in blood transfusion centre, **1349**
Haematological and biochemical parameters in Saudi blood donors, study of reference values for, **69**
—— disorders, bone marrow biopsies in, **257**
Haematology laboratory instruments, evaluation of, guidelines for, **1095**
Haematoxyphil bodies, pulmonary (L), **690**
Haemic and non-haemic tissue, normal, distribution of neutrophil granulocytic cell antigen defined by monoclonal antibody (3C4) within, **959**
Haemodialysis osteomalacia induced by aluminium (L), **792**
Haemoglobin assay, carboxyhaemoglobin as reference material for, **292**
——, glycosylated, in chronic renal failure and after renal transplantation, **737**
β-Haemolytic streptococci grouping by agglutination, improved Streptex kit for, evaluation of, **719**
Haemophilia, *in vivo* recovery of transfused factor VIII C in, effect of height and weight in adolescent patients, **289**
——, rheumatoid arthritis and other rheumatic disorders, anticoagulant antibodies in synovial membranes in, **673**
Haemophilus spp isolates, routine characterisation of, methods for, **1024**
Haemorrhage, myocardial, with dyspnoea and arrhythmia in case of thrombocytopenia, **858**
Hairy cell leukaemia associated with polycythaemia rubra vera, case of, spleen studies of, **1312**
Hashimoto's thyroiditis, hypothyroidism in, somatostatin as paracrine contribution to, **764**
Height and weight, effect on *in vivo* recovery of transferred factor VIII C in adolescent haemophiliacs, **289**
Hepatitis B and A virus antibodies in alcoholic steatosis and cirrhosis, **693**
—— —— antigen detection in paraffin sections of liver, orcein in, **430**
——, chronic active, smooth muscle and measles virus antibodies in sera in, lack of cross-reactivity between, **1388**
Hepatomas, liver cell nuclear size and shape in, morphometric study with interactive computer technique, **1057**
Herpes simplex virus and cytomegalovirus disease after renal transplantation, prospective study, **1190**
Heterotopic gastric mucosa in duodenum, **591**
Histamine tissue levels in duodenal mucosa, increase in children with coeliac disease, **596**
Histiocytomas, fibrous, malignant, of salivary glands, **946**
Histiocytosis, malignant, of intestine, 3 cases with immunological and cytochemical analysis, **510**
——, ——, of nose, presenting as lethal midline granuloma, intestinal villous atrophy with crypt hyperplasia in, **606**
——, ——, presenting as lethal midline granuloma, nasal biopsy findings in, **599**
—— X, skin and lymph node lesions in, combined immunological and histochemical analysis of, **327**
Histochemical and immunological analysis, combined, of skin and lymph node lesions in histiocytosis X, **327**
—— methods and electron probe *x*-ray microanalysis in localisation of bone tissue aluminum in renal osteodystrophy, **1283**
—— —— for oestrogen receptor localisation, biochemical assessment of, **401**
Histological and biochemical methods for measurement of liver iron overload, comparison with automated image analysis, **45**
Histopathology laboratory, word processor in, facilities available and practical use, **151**; (L), **1034**
—— record keeping, computer programs in, **40**
——, surgical, routine, combined light/electron microscope (LEM 2000) in, **425**
——, technical aspects of, external quality assessment of, value of, **1050**
Hodgkin's disease, α-naphthyl acetate esterase-positive cells in; quantitative study of, **1301**
Hormonal studies of bilateral gonadoblastoma/dysgerminoma in 46 XY patient, **420**
Horseradish peroxidase and alkaline phosphatase, double immunoenzyme labelling with, improved method for, **1092**
Hovig bodies. *See* Tubular arrays, parallel
Howie code for laboratory safety, costs, benefits and alternatives, **1018**
Hydroxyproline: creatinine ratio, urinary, fasting, measurement in normal adults and variation with age and sex, **807**
Hypercalcaemia and basic isoferritin in renal cell carcinoma, **1008**
—— and primary hyperparathyroidism, incidence in biochemical profiles of 24 500 patients, **395**
—— due to coexistence of parathyroid adenoma and myelomatosis, case of, **732**
Hyperparathyroidism, primary, and hypercalcaemia, incidence in biochemical profiles of 24 500 patients, **395**
Hypertension, portal, systemic mastocytosis with, case confused with primary myelofibrosis, **617**
Hypochlorite solution, buffered, for disinfection of fibrescopes, **296**
Hypothermia, accidental, and acute pancreatitis, relation between, morphological study of, **1244**
Hypothyroidism in Hashimoto's thyroiditis, somatostatin as paracrine contribution to, **764**
Hypoxia, intrapartum, association between neurological assessment of damage and abnormal excretion of ATP metabolites in, **999**
Hypoxic lung disease, chronic, oxygen transport in, review of, **797**

ICSH recommendations for analysis of red cell, white cell and platelet size distribution curves, **1320**
ICSH/BCR reference materials for standardisation in laboratory control of oral anticoagulant therapy (L), **1395**
Ileum and colon, Crohn's disease of, morphological and immunohistochemical findings in upper gastrointestinal biopsies in, **934**
Image analysers in quantitative morphometric analysis of non-Hodgkin's lymphoma, **135**
—— analysis, automated, for measurement of liver iron overload, comparison with biochemical and histological methods, **45**
Immune antitetanus antibodies, manual screening with latex coated with tetanus toxoid for, **899**
—— complexes, circulating, and complement levels in alcoholic liver disease, **380**
—— ——, ELISA for, dextran sulphate for inhibition of direct binding of anti-IgG enzyme conjugate to solid-phase C1q in (L), **581**
Immunoassay measurements of serum ferritin in normal subjects and in malignant lymphoma and chronic renal failure, comparison of 7 techniques, **1204**
Immunocytochemical identification of breast carcinoma cells in effusions with monoclonal antibody (L), **1037**
Immunocytochemistry of gastric mucosal blood group antigens (L), **245**
Immunoelectrophoresis, crossed, effect of treatment with 17α-alkylated androgens (danazol and stanazolol) on C4 conversion products in hereditary angioedema studied by, **728**
Immunoenzyme labelling, double, with alkaline phosphatase and horseradish peroxidase, improved method for, **1092**
Immunofluorescence, anticomplement, ELISA, radioimmunoassay, complement fixation and passive haemagglutination for detection of cytomegalovirus IgG antibody, comparison of, **1345**
—— in immunohistological study of lung, comparison with immunoperoxidase method, **144**
——, indirect, liver membrane autoantibodies determined by, characterisation of, **315**

Immunofluorescent antibody test, indirect, for virus infections, FITC-protein A replacement of fluorescein-conjugated anti-gammaglobulins in, **472**
Immunoglobulin A antibodies to mumps virus in serum, detection of, ELISA for, **1129**
—— —— —— to varicella zoster virus, determination by immunoperoxidase assay, **645**
—— —— deficiency in Israeli blood donors (L), **582**
—— G antibody, cytomegalovirus-specific, detection of, comparison of ELISA, radioimmunoassay, complement fixation, anti-complement immunofluorescence and passive haemagglutination for, **1345**
—— ——, IgG-Fc receptor. *See* Fc-IgG receptor
—— M, antitoxoplasma, detection of, ELISA and antibody class capture for, development and use in toxoplasmic lymphadenopathy, **892**
Immunoglobulin-amylase complexes, protein contents and binding modes of, **385**
Immunoglobulins, distribution in bone marrow plasma cells as diagnostic aid for primary amyloidosis, **285**
——, secretory system, in colonic neoplasia, immunoperoxidase study of, **14**
——, surface, of lymphoid cells, detection by direct immunoperoxidase method, comparative study with live and fixed cells, **139**
Immunohistochemical and morphological findings in upper gastrointestinal biopsies in Crohn's disease of ileum and colon, **934**
—— patterns of epithelial marker antigens and plasma CEA levels in large bowel carcinoma, **922**
—— staining of formalin-fixed paraffin-embedded tissue, influence of decalcification, **1392**
—— study demonstrating macrophage origin of Reed-Sternberg cells, **159**
Immunohistological study of lung by immunoperoxidase method and comparison with immunofluorescence, **144**
Immunological and cytochemical analysis of 3 cases of malignant histiocytosis of intestine, **510**
—— and histochemical analysis, combined, of skin and lymph node lesions in histiocytosis X, **327**
—— damage, localised, in vulvar lichen sclerosus et atrophicus, evidence of (L), **1395**
—— localisation of β-thromboglobulin and platelet factor 4 in megakaryocytes and platelets, **1227**
Immunoperoxidase assay determination of IgA antibodies to varicella zoster virus, **645**
—— method, direct, for detection of surface immunoglobulins of lymphoid cells, comparative study with live and fixed cells, **139**
—— —— in immunohistological study of lung and comparison with immunofluorescence, **144**
—— study of secretory immunoglobulin system in colonic neoplasia, **14**
Immunoproteins, demonstration in araldite-embedded tissues, **111**; (L), **904**
Immunoreactive trypsin and pancreatic isoamylase in serum, measurement of, diagnostic value in cystic fibrosis, comparison of, **547**
Immunosuppressive therapy, response to, relation with inhibitory effects of peripheral blood lymphocytes on *in vitro* colony formation by autologous bone marrow in aplastic anaemia, **1316**
Incubator, anaerobic, for isolation of anaerobes from clinical specimens, comparison with standard jars, **1158**
Indium-111 elution from reticuloendothelial cells, **507**
Indium-111-labelled leucocytes in diagnosis of Felty's syndrome, **74**
Infections, clinical, isolation of *B. ureolyticus* from, **309**
Instruments used in haematology laboratories, evaluation of, guidelines for, **1095**
International Committee for Standardisation in Haematology. *See* ICSH
Intestinal mucosal mast cells, human, after glutaraldehyde fixation, staining properties of, **897**
Intestine, large, carcinoma of, plasma CEA levels and immunohistochemical patterns of epithelial marker antigens in, **922**
Intestines, histiocytosis of, malignant, 3 cases with immunological and cytochemical analysis, **510**
——, inflammatory disease of, rectal biopsy diagnosis of, medical audit of, **341**; (L), **476**
——, lymphoid tissue studies, **517**
——, mucosal biopsies, orientation of, double embedding in agar/paraffin wax as aid to (L), **365**
——, villous atrophy with crypt hyperplasia in malignant histiocytosis of nose presenting as lethal midline granuloma, **606**
Intrapartum hypoxia, association between neurological assessment of damage and abnormal excretion of ATP metabolites in, **999**
Intrinsic factor preparation with R-proteins blocked by vitamin B_{12} analogues, radioisotopic assay for vitamin B_{12} using, assessment of, **1110**
Ions and short chain fatty acids, luminal, as markers of functional activity of mucosa in ulcerative colitis, **323**
——, exchange, and lectin affinity chromatography after DNA precipitation in purification of C1q, **1114**
——, inorganic, and glucose in CSF and plasma in chronic renal failure, relations between, **631**
Iron dextran total dose infusion, effect on placental storage iron content in iron deficiency anaemia during pregnancy, **502**
—— granules in plasma cells, **172**
—— overload and chronic liver disease, serum ferritin binding to concanavalin A in, **481**
—— —— and β-thalassaemia major, serum ferritin levels in, effect of ascorbic acid deficiency, **487**
Isoamylase, pancreatic, and immunoreactive trypsin in serum, measurement of, diagnostic value in cystic fibrosis, comparison of, **547**
Isoferritin, basic, and hypercalcaemia in renal cell carcinoma, **1008**
Israeli blood donors, IgA deficiency in (L), **582**

Jejunum, crypt cell abnormalities associated with methotrexate treatment in children with acute lymphoblastic leukaemia, **1272**
——, epithelial lymphocyte mitotic indices, rise in, predictive value in diagnosis of gluten-sensitive enteropathy, **517**
Josamycin, Moxalactam, Cefotaxime, Cefmetazole and erythromycin, *in vitro* responses of *Bacteroides fragilis* to (L), **1166**

Kidney. *See* Renal
Kingella kingae, osteomyelitis and septic arthritis due to, **219**

Laboratories, haematology, instruments used in, evaluation of, guidelines for, **1095**
Laboratory automated equipment, decontamination of (L), **580**
——, histopathology, word processor in, facilities available and practical use, **151**; (L), **1034**
—— proficiency testing system in bacteriology in Ontario Province, organisation and impact of, **94**
—— safety, Howie code for, costs, benefits and alternatives, **1018**
β-Lactam antibiotics in combination with aminoglycosides, assay of, **787**
Lactic acid measurement in synovial fluid in diagnosis and management of septic arthritis, **390**
Latex agglutination test (Toxotest-MT) for detection of antibodies to *Toxoplasma gondii* in sera, comparison with dye test and indirect haemagglutination test, **228**
—— coated with tetanus toxoid in manual screening for immune antitetanus antibodies, **899**
—— tests, false positive, for cryptococcal antigen in cerebrospinal fluid (L), **244**
Lectin affinity chromatography and ion exchange after DNA precipitation in purification of C1q, **1114**
Lectins in tissue carbohydrate identification, **239**
Lee Sedimentometer for photographic recording of ESR (L), **243**

Legionella pneumophila, antibodies to, detection of, ELISA test for, **657**
—— —— infection, diagnosis by indirect fluorescent antibody test, polyvalent heat-killed antigen for, **434**
—— —— —— —— —— —— —— —— —— —— with formolised yolk sac antigens, **211**; *Erratum*, **692**
—— ——, presumptive identification of, disc technique for, **1353**
—— —— serogroup 1 infection, diagnosis of, microagglutination test for, **1028**
—— —— —— —— —— Legionnaires' disease due to, early diagnosis by indirect fluorescent antibody test with formolised yolk sac antigen (L), **791**
Leucocytes, blood poor in, production of, comparative study of Fenwal and Pall microaggregate filters in, **681**
——, erythrocytes and platelets, size distribution curve analysis, ICSH recommendations for, **1320**
——, ^{111}indium-labelled, in diagnosis of Felty's syndrome, **74**
Leukaemia, acute, antibiotic therapy in, serum C-reactive protein level as guide to, **866**
——, granulocytic, chronic, and multiple myeloma, simultaneous presentation of (L), **364**
——, hairy cell, associated with polycythaemia rubra vera, case of, spleen studies of, **1312**
——, lymphoblastic, acute, methotrexate treatment in children with, jejunal crypt cell abnormalities associated with, **1272**
——, lymphocytic, chronic, and B lymphocytic lymphoma, differential diagnosis of, comparison of mouse red cell rosette formation and colchicine sensitivity test for, **376**
——, ——, ——, of T cell origin, parallel tubular arrays in, lysosomal localisation of, **167**
——, myeloid, acute, cytogenetic study with peripheral blood samples sent by post, **861**
——, myelomonocytic, acute, presenting as xanthomatous skin eruption, case of, **1200**
Lichen sclerosis et atrophicus, vulvar, localised immunological damage in, evidence of (L), **1395**
Light and electron microscope study of case of micronodular adrenal disease causing Cushing's syndrome, **1078**
—— and scanning electron microscopy of cells, sequential, method using localising microcoverslips for, **576**
Light/electron microscope, combined (LEM 2000), in routine surgical histopathology, **425**
Liver biopsy needles, comparison of Trucut and Surecut types, **761**
—— cell necrosis in alcoholics, serum glutamate dehydrogenase activity as marker of, **207**
—— —— nuclear size and shape in hepatomas, morphometric study with interactive computer technique, **1057**
—— cells, reaction of human antiactin antibodies purified by affinity chromatography against, **750**
—— disease, acquired dysfibrinogenaemia in, **667**
—— ——, alcoholic, circulating immune complexes and complement levels in, **380**
—— ——, chronic, and iron overload, serum ferritin binding to concanavalin A in, **481**
—— ——, ——, lysozyme in, biochemical and histological study of, **815**
—— ——, comparison of serum glycocholic acid radioimmunoassay with standard liver function tests and liver biopsy findings in children with, **1011**
—— function in septic shock, **1249**
——, hepatitis B antigen detection in paraffin sections of, orcein in, **430**
—— membrane (auto)antibodies determined by indirect immunofluorescence, characterisation of, **315**
——, papain digest of, homemade blood culture broth with, for isolation of anaerobes from simulated paediatric blood cultures, comparison with commercial media, **1142**
——, veno-occlusive disease of, toxic, 6-thioguanine as cause of, **1086**
Lumac kit for detection of bacteriuria by bioluminescence, evaluation of, **107**
Luminal ions and short chain fatty acids as markers of functional activity of mucosa in ulcerative colitis, **323**
Lung cancer, morphological diagnosis in respiratory medicine department, analysis of accuracy, **414**; (L), **1167**
—— carcinoid associated with primary endocrine carcinoma of parotid salivary gland, **611**
——, computed tomography images of, pathological evaluation of, **536**
—— disease, hypoxic, chronic, oxygen transport in, review of, **797**
——, immunohistological study by immunoperoxidase method and comparison with immunofluorescence, **144**
——, post-mortem inflation and fixation, modified gas apparatus for, **1294**
Lupus erythematosus, systemic, with high DNA-binding capacity but lacking antinuclear antibodies, incidence of, **1118**
Lymosomal granules in fibroblasts, distribution pattern in Chediak-Higashi syndrome, **496**
Lymph node and skin lesions in histiocytosis X, combined immunological and histochemical analysis of, **327**
—— —— infarction, segmental, after fine-needle aspiration, **855**
—— nodes, reactive, and non-Hodgkin's lymphomas, α-naphthyl acetate esterase-positive cells in, quantitative study of, **1066**
Lymphadenopathy due to silicone (L), **901**; *Addendum*, **1038**
——, toxoplasmic, detection of antitoxoplasma IgM in, ELISA and antibody class capture for, **892**
Lymphoblastic leukaemia, acute, methotrexate treatment in children with, jejunal crypt cell abnormalities associated with, **1272**
Lymphocyte transformation test in detection of beryllium hypersensitivity, comparison with macrophage migration inhibition test, **684**
Lymphocytes, epithelial, jejunal, mitotic indices of, rise in, predictive value in diagnosis of gluten-sensitive enteropathy, **517**
——, percentage and number estimation on Coulter Counter, Model S Plus Phase II, **1194**
——, peripheral blood, inhibitory effects on *in vitro* colony formation by autologous bone marrow in aplastic anaemia, and relation with response to immunosuppressive therapy, **1316**
——. *See also* T and B cells
Lymphocytic leukaemia, chronic, and B lymphocytic lymphoma, differential diagnosis of, comparison of mouse red cell rosette formation and colchicine sensitivity test for, **376**
—— ——, ——, of T cell origin, parallel tubular arrays in, lysosomal localisation of, **167**
Lymphoid cells, surface immunoglobulins of, detection by direct immunoperoxidase method, comparative study with live and fixed cells, **139**
—— tissue, intestinal, studies of, **517**
Lymphoma cells in CSF confirmed by chromosome analysis, **1307**
——, lymphocytic, B cell (non-Hodgkin's), and chronic lymphocytic leukaemia, differential diagnosis of, comparison of mouse red cell rosette formation and colchicine sensitivity test for, **376**
——, malignant, and chronic renal failure, serum ferritin measurements in, comparison of 7 immunoassay techniques, **1204**
——, ——, α_1-antitrypsin phenotypes in, **1213**
——, non-Hodgkin's, and reactive lymph nodes, α-naphthyl acetate esterase-positive cells in, quantitative study of, **1066**
——, ——, nuclear diameters in, **954**
——, ——, quantitative morphometric analysis with image analysers in, **135**
——, ——, T and B cells in effusions as markers for, **1216**
Lymphoproliferative disorders, bone marrow biopsies in, **270**
Lysosomal localisation of parallel tubular arrays in chronic lymphocytic leukaemia of T cell origin, **167**
Lysozyme in chronic liver disease, biochemical and histological study of, **815**

Macrophage migration inhibition test in detection of beryllium hypersensitivity, comparison with lymphocyte transformation test, **684**

—— origin of Reed-Sternberg cells demonstrated by immunohistochemical study, **159**
Malignancy, diagnosis of Feulgen-hydrolysis profiles of DNA in exfoliated cervical cells as aid in, **345**
——, extrahepatic, in primary biliary cirrhosis, increased incidence in survey of 85 patients, **541**
——, histopatholical diagnosis of, monoclonal antibodies for, **1253**
Mammographic abnormalities in breast biopsy specimens, histological localisation of, **1163**
Marrow. *See* Bone marrow.
Mast cells of human intestinal mucosa after glutaraldehyde fixation, staining properties of, **897**
Mastitis, granulomatous, 7 cases of, **941**
Mastocytosis, systemic, with portal hypertension, case confused with primary myelofibrosis, **617**
Maternal autopsies, determination of cause of death in, review of procedures, **909**
Measles virus and smooth muscle antibodies in sera in chronic active hepatitis, lack of cross-reactivity between, **1388**
Medical audit, **254**
—— —— of rectal biopsy diagnosis of inflammatory bowel disease, **341**; (L), **476**
Megakaryocytes and platelets, β-thromboglobulin and platelet factor 4 in, immunological localisation of, **1227**
Megaloblastic anaemia, severe, and acidosis, **984**
Meningitis, bacterial, false-positive complement fixing antibodies against *Mycoplasma pneumoniae* in (L), **903**
Meningococcal septicaemia, early diagnosis of, buffy coat microscopy for, evaluation of (L), **691**
Mepacrine hydrochloride, case of collagenous colitis treated with, **338**
Metastatic process, review of, **1041**
Methotrexate treatment in children with acute lymphoblastic leukaemia, jejunal crypt cell abnormalities associated with, **1272**
Metronidazole, reciprocal antimicrobial synergism between *Escherichia coli* and *Bacteroides fragilis* in presence of, **1150**
Microagglutination test for diagnosis of *Legionella pneumophila* (serogroup 1) infection, **1028**
Microbiological quality control, UK External Quality Assessment Scheme, **82**; (L), **692**
—— —— ——, —— —— —— —— ——, antibiotic susceptibility testing trial in, **1169**
Micrococci and staphylococci, identification of, evaluation of API Staph micromethod gallery for, **650**
Microcomputer system for clinical bacteriology, 12 months' trial of, **881**
—— —— for collection and analysis of antibiotic sensitivity test data, **444**
Microprocessor system, flexible, for measurement of cell size, **620**
Microscopy, computer-aided, interactive, in measurement of striated muscle fibre diameters, **1268**
Monoclonal antibodies for histopathological diagnosis of malignancy, **1253**
—— —— in identification of surface antigens on fixed cells (L), **1295**
—— —— to tumours, review of, **369**
—— antibody in immunocytochemical identification of breast carcinoma cells in effusions (L), **1037**
—— —— (3C4), neutrophil granulocytic cell antigen defined by, distribution within normal haemic and non-haemic tissue, **959**
—— gammopathies in adult population of Finistère, France, **63**
Monocyte function in cirrhosis, **972**
Morphometric analysis of urothelial cells in voided urine in low grade and high grade bladder tumours, **1063**
—— study of liver cell nuclear size and shape in hepatomas with interactive computer technique, **1057**
Mothers. *See* Maternal
Moxalactam, Cefotaxime, Cefmetazole, Josamycin and erythromycin, *in vitro* responses of *Bacteroides fragilis* to (L), **1166**
Mucosa, colonic, functional activity in ulcerative colitis, luminal ions and short chain fatty acids as markers of, **323**
——, duodenal, histamine tissue levels, increase in children with coeliac disease, **596**
——, gastric, heterotopic, in duodenum, **591**
——, intestinal, biopsies of, orientation of, double embedding in agar/paraffin wax as aid to (L), **365**
——, ——, human, mast cells of, after glutaraldehyde fixation, staining properties of, **897**
——, rectal, normal, plasma cells in, distribution of, **820**
Mucus secretion criteria for differential diagnosis of solitary ulcer and non-specific proctitis, **26**
Mumps virus, IgA antibodies in serum to, detection of, ELISA for, **1129**
Muscle fibres, striated, diameters of, measurement with interactive computer-aided microscopy, **1268**
Mycoplasma pneumoniae, complement fixing antibodies against, false-positive, in bacterial meningitis (L), **903**
Myelofibrosis, primary, case of systemic mastocytosis with portal hypertension confused with, **617**
Myeloid leukaemia, acute, cytogenetic study with peripheral blood samples sent by post, **861**
Myeloma, multiple, and chronic granulocytic leukaemia, simultaneous presentation of (L), **364**
Myelomatosis coexisting with parathyroid adenoma, hypercalcaemia due to, case of, **732**
Myelomonocytic leukaemia, acute, presenting as xanthomatous skin eruption, case of, **1200**
Myeloproliferative disorders, chronic, bone marrow biopsies in, **263**
Myocardial haemorrhage with dyspnoea and arrhythmia in case of thrombocytopenia, **858**
—— infarction, creatine phosphokinase tetrazolium test in macroscopic histochemical detection of, artefactual nature of, **407**
—— ——, nitroblue tetrazolium dehydrogenase test in macroscopic histochemical detection of, effect of added NAD, cyanide and PMS, **410**

α-Naphthyl acetate esterase-positive cells in Hodgkin's disease, quantitative study of, **1301**
—— —— —— —— in non-Hodgkin's lymphomas and reactive lymph nodes, quantitative study of, **1066**
Nasal brushing for study of ciliary ultrastructure, **357**
National Clinical Pathology Service, proposed, evaluation of, **254**
Needles for liver biopsy, comparison of Trucut and Surecut types, **761**
Neisseria, oral, gene exchange and transformation in gonorrhoea, evidence for, **1153**
Neisseria gonorrhoeae growth at 25° C (L), **118**
—— ——, —— in Brain Heart Infusion (L), **119**
—— ——, penicillinase-producing strains of, failure of fluorescent antibody test to identify, **215**
—— ——, recovery from clinical specimens after direct culture at 25° C and 28° C (L), **902**
Neoplasia, colorectal, secretory immunoglobulin system in, immunoperoxidase study of, **14**
——, intraepithelial, cervical, review of, **1**; *Erratum*, **478**
Neoplastic gastrointestinal tissue, total creatine kinase activity and isoenzyme patterns in, **204**
Nephropathy, diabetic, antithrombin III and fibrinogen degradation product (fragment E) in, **661**
Neural-tube defect risk assessment for individual pregnancies using alphafetoprotein and acetylcholinesterase test results, **1334**
Neurological assessment of damage in intrapartum hypoxia, relation to abnormal excretion of ATP metabolites, **999**
Neuropathological findings in 24 renal transplant patients, **31**
Neutrophil alkaline phosphatase activity, relation to Fc-IgG receptor development in blood and bone marrow, **967**
—— granulocytic cell antigen defined by monoclonal antibody (3C4), distribution within normal haemic and non-haemic tissue, **959**

New Zealand and Australian survey of paediatric bilirubin analyses, **52**; (L), **901**
Nicotinamide adenine dinucleotide, cyanide and PMS as additives to NBT-dehydrogenase test in macroscopic histochemical detection of myocardial infarction, **410**
Nitroblue tetrazolium dehydrogenase test in macroscopic histochemical detection of myocardial infarction, effect of added NAD, cyanide and PMS, **410**
Nose, biopsy findings in malignant histiocytosis presenting as lethal midline granuloma, **599**
——, malignant histiocytosis of, presenting as lethal midline granuloma, intestinal villous atrophy with crypt hyperplasia in, **606**
Notices, **124, 368, 796, 904, 1037, 1168**
Nuclear diameters in non-Hodgkin's lymphomas, **954**
Nucleic acid synthesis in marrow cells and erythroblast abnormalities in case of congenital dyserythropoietic anaemia type III, **1103**
Nucleotides. *See* Guanosine 3′, 5′ monophosphate

Oestrogen receptor localisation, histochemical methods for, biochemical assessment of, **401**
Oncology. *See* Tumours
Orcein in detection of hepatitis B antigen in paraffin sections of liver, **430**
—— staining for demonstration of sulphomucins (L), **366**
Osteoclasts from Paget's disease of bone, ultrastructural features related to viral aetiology, **771**
Osteodystrophy, renal, aluminium in bone tissue in, localisation by histochemical methods and electron probe *x*-ray microanalysis, **1283**
Osteomalacia, histological, diagnosis of, value of plasma calcium, phosphate, and alkaline phosphatase measurements in, **625**
—— in dialysis induced by aluminium (L), **792**
Osteomyelitis and septic arthritis due to *Kingella kingae*, **219**
Ovarian tumours of Wolffian or allied nature, **526**
Oxygen transport in chronic hypoxic lung disease, review of, **797**

Paget's disease of bone, osteoclasts from, ultrastructural features related to viral aetiology, **771**
Pall and Fenwal microaggregate filters in production of leucocyte-poor blood, comparative study of, **681**
Pancreas, exocrine function, fluorescein-dilaurate and secretin-cholecystokinin tests for, prospective comparison of, **1240**
Pancreatic exocrine adenocarcinoma, site of origin of, significance of, **544**
—— isoamylase and immunoreactive trypsin in serum, measurement of, diagnostic value in cystic fibrosis, comparison of, **547**
Pancreatitis, acute, and accidental hypothermia, relation between, morphological study of, **1244**
Papain liver digest, homemade blood culture broth with, for isolation of anaerobes from simulated paediatric blood cultures, comparison with commercial media, **1142**
Paracrine somatostatin as contribution to hypothyroidism in Hashimoto's thyroiditis, **764**
Parathyroid adenoma coexisting with myelomatosis, hypercalcaemia due to, case of, **732**
Parathyroiditis, hyperplastic, evidence of autoimmune process in case of, **812**
Parotid salivary gland, primary endocrine carcinoma of, associated with lung carcinoid, **611**
Particles, isolation from biological fluids, ferrography for, **689**
Parvovirus-like agent, infection with, occurrence in children with sickle cell anaemia during 2-year period, **744**
Pathogens, urinary, resistance to trimethoprim in Finland (L), **117**
Penicillinase, *Neisseria gonorrhoeae* strains producing, failure of fluorescent antibody test to identify, **215**
Peritonitis in patients undergoing continuous ambulatory peritoneal dialysis, laboratory diagnosis of, **1181**
Phenazine methosulphate, NAD and cyanide as additives to NBT-dehydrogenase test in macroscopic histochemical detection of myocardial infarction, **410**
Phosphate, calcium, and alkaline phosphatase in plasma, measurements of, value in diagnosis of histological osteomalacia, **625**
Photographic recording of ESR with Lee Sedimentometer (L), **243**
Placenta, storage iron content in iron deficiency anaemia during pregnancy, effect of total dose infusion of iron dextran, **502**
Plasma and CSF inorganic ions and glucose in chronic renal failure, relations between, **631**
—— calcium, phosphate, and alkaline phosphatase measurements, value in diagnosis of histological osteomalacia, **625**
—— carcinoembryonic antigen levels and immunohistochemical patterns of epithelial marker antigens in large bowel carcinoma, **922**
—— cells in normal rectal mucosa, distribution of, **820**
—— ——, iron granules, in **172**
—— —— of bone marrow, Ig distribution in, as diagnostic aid for primary amyloidosis, **285**
Plasminogen activator in tissue, quantitative assay method for, **980**
Plastic packs, PL146 and PL732, platelet storage in, comparative *in vitro* studies, **1323**
Platelet counting, differential centrifugation method for, **114**
—— inhibition with Ticlopidine in atherosclerotic intermittent claudication, trial of, **740**
——, red cell and white cell size distribution curve analysis, ICSH recommendations for, **1320**
—— storage in PL146 and PL732 plastic packs, comparative *in vitro* studies, **1323**
—— thrombi, histological demonstration with double silver impregnation argyrophil stain, **1032**
Platelets and magakaryocytes, β-thromboglobulin and platelet factor 4 in, immunological localisation of, **1227**
——, morphological and functional disturbances induced by cryopreservation, **870**
Pleural effusions, exudative, fibronectin in, **723**
Polyacrylamide gel electrophoresis in measurement of body fluid proteins, **1328**
Ploycythaemia rubra vera associated with hairy cell leukaemia, case of, spleen studies of, **1312**
Porphyrins, urinary, separation and quantification of, method for, **1232**
Portal hypertension, systemic mastocytosis with, case confused with primary myelofibrosis, **617**
Pregnancies, individual, neural-tube defect risk for, assessment using alphafetoprotein and acetylcholinesterase test results, **1334**
Pregnancy, iron deficiency anaemia during, effect of total dose infusion of iron dextran on placental storage iron content in, **502**
Preston (selective) medium for isolation of *Campylobacter jejuni/coli* from faeces, comparison with Skirrow's medium, **462**; (L), **1036**
Proctitis, non-specific, and solitary ulcer syndrome, morphological and mucus secretion criteria for differential diagnosis of, **26**
Prostatectomy, bacteriuria in patients undergoing, **1185**
——, death during (L), **117**
Protein contents and binding modes of immunoglobulin-amylase complexes, **385**
——, C-reactive, serum level as guide to antibiotic therapy in acute leukaemia, **866**
Proteins in body fluids, measurement by polyacrylamide gel electrophoresis, **1328**
Pseudomonas fluorescens isolation after suprapubic catheterisation (L), **581**
Pulmonary haematoxyphil bodies (L), **690**

Quality assessment, external, of technical aspects of histopathology, value of, **1050**
—— control, microbiological, UK External Quality Assessment Scheme, **82**; (L), **692**

——— ———, ———, ——— ——— ——— ——— ———, antibiotic susceptibility testing trial in, **1169**
——— ——— terminology, IFCC recommendations and practical implications (L), **1297**

Radioimmunoassay, ELISA, complement fixation, anticomplement immunofluorescence and passive haemagglutination for detection of cytomegalovirus IgG antibody, comparison of, **1345**
—— for detection of antibodies to tetanus toxoid, comparison with direct haemagglutination method, **1138**
—— of serum glycocholic acid, comparison with standard liver function tests and liver biopsy findings in children with liver disease, **1011**
Radioisotopic assay for vitamin B_{12} using intrinsic factor preparation with R-proteins blocked by vitamin B_{12} analogues, assessment of, **1110**
Rectal biopsy diagnosis of inflammatory bowel disease, medical audit of, **341**; (L), **476**
—— mucosa, normal, plasma cells in, distribution of, **820**
Rectum, solitary ulcer syndrome, and non-specific proctitis, morphological and mucus secretion criteria for differential diagnosis of, **26**
Red cell(s). *See* Erythrocyte(s)
Reed-Sternberg cells, macrophage origin demonstrated by immunohistochemical study, **159**
Renal cell carcinoma, basic isoferritin and hypercalcaemia in, **1008**
—— dysplasia and Wilms' tumour, **1069**
—— failure, advanced, quantitative bone histology in 38 patients, **125**
——— ———, chronic, and malignant lymphoma, serum ferritin measurements in, comparison of 7 immunoassay techniques, **1204**
——— ———, ———, calcification fronts in, demonstration by *in vivo* and *in vitro* tetracycline labelling, **1278**
——— ———, ———, glycosylated haemoglobin levels in, comparison with levels after renal transplantation, **737**
——— ———, ———, relations between CSF and plasma inorganic ions and glucose in, **631**
—— osteodystrophy, aluminium in bone tissue in, localisation by histochemical methods and electron probe *x*-ray microanalysis, **1283**
—— tissue, Epon-embedded, preparation for scanning electron microscopy, **1384**
—— transplantation, cytomegalovirus and herpes simplex virus disease after, prospective study, **1190**
——— ———, neuropathological and general necropsy findings in 24 patients, **31**
Respiratory tract, upper, bacteria of, isolation of, evaluation of swabs and swab-transport media kits in, **223**
Reticuloendothelial cells, ^{111}indium elution from, **507**
Rheumatoid arthritis, other rheumatic disorders and haemophilia, anticoagulant antibodies in synovial membranes in, **673**
——— ———, serum γ-glutamyltransferase and alkaline phosphatase in, **638**; (L), **1395**
Rotavirus infection, diagnosis of, comparison of ELISA, SPACE and electron microscopy for, **104**
R-proteins blocked by vitamin B_{12} analogues, radioisotopic assay for vitamin B_{12} using intrinsic factor preparation with, assessment of, **1110**
Rubella infection, recent, diagnosis by enzyme-linked immunosorbent assay, **101**
—— vaccination, post-partum, evaluation of, **1340**

Safety cabinets, microbiology, class 1, disinfection with formaldehyde, problems in, **698**
———, laboratory, Howie code for, costs, benefits and alternatives, **1018**
Salicylate screening in sera of voluntary blood donors, 2 analytical methods, **59**
Salivary gland tumours, tyrosine crystals in (L), **120**
—— glands, malignant fibrous histiocytomas of, **946**
Saudi blood donors, haematological and biochemical parameters in, study of reference values for, **69**
Secretin-cholecystokinin test for pancreatic exocrine function, prospective comparison with fluorescein-dilaurate test, **1240**
Sensitivity testing agar, failure of growth on (L), **1396**
Septic shock, liver function in, **1249**
Septicaemia due to *Streptococcus bovis*, recurrent, antibiotic management of case of, value of minimum bactericidal concentration in, **879**
———, meningococcal, early diagnosis of, buffy coat microscopy for, evaluation of (L), **691**
Serological characterisation of *Ureaplasma urealyticum* strains by ELISA, **439**
Serum *Aspergillus fumigatus* antibodies, detection of, rapid ELISA for, **1134**
—— bile acids, influence of gallbladder, **754**
—— C-reactive protein level as guide to antibiotic therapy in acute leukaemia, **866**
———, detection of antibodies to *Toxoplasma gondii* in, comparative study of 3 tests (Toxotest-MT latex agglutination test, dye test, indirect haemagglutination test), **228**
—— ferritin binding to concanavalin A in iron overload and chronic liver disease, **481**
——— ——— levels in β-thalassaemia major and iron overload, effect of ascorbic acid deficiency, **487**
——— ——— measurements in normal subjects and in malignant lymphoma and chronic renal failure, comparison of 7 immunoassay techniques, **1204**
—— glutamate dehydrogenase activity as marker of liver cell necrosis in alcoholics, **207**
—— γ-glutamyltransferase and alkaline phosphatase in rheumatoid arthritis, **638**; (L), **1395**
—— glycocholic acid, radioimmunoassay of, comparison with standard liver function tests and liver biopsy findings in children with liver disease, **1011**
—— IgA antibodies to mumps virus, detection of, ELISA for, **1129**
—— of voluntary blood donors, salicylate screening in, 2 analytical methods, **59**
—— pancreatic isoamylase and immunoreactive trypsin measurement, diagnostic value in cystic fibrosis, comparison of, **547**
—— smooth muscle and measles virus antibodies in chronic active hepatitis, lack of cross-reactivity between, **1388**
Sex and age variation in fasting urinary hydroxyproline: creatinine ratio in normal adults, **807**
Shock, septic, liver function in, **1249**
Sickle cell anaemia, occurrence of infection with parvovirus-like agent during 2-year period in children with, **744**
Silicone lymphadenopathy (L), **901**; *Addendum*, **1038**
Skin and lymph node lesions in histiocytosis X, combined immunological and histochemical analysis of, **327**
———, xanthomatous eruption of, acute myelomonocytic leukaemia presenting as, case of, **1200**
Skirrow's medium for isolation of *Campylobacter jejuni/coli* from faeces, comparison with selective (Preston) medium, **462**; (L), **1036**
Smooth muscle and measles virus antibodies in sera in chronic active hepatitis, lack of cross-reactivity between, **1388**
Solid phase aggregation of coupled erythrocytes for diagnosis of rotavirus infection, comparison with ELISA and electron microscopy, **104**
Somatostatin as paracrine contribution to hypothyroidism in Hashimoto's thyroiditis, **764**
Soya protein antibodies in coeliac disease, occurrence and possible relevance, **319**
SPACE. *See* Solid phase aggregation of coupled erythrocytes
Spectrophotometric methods, direct, in paediatric bilirubin analyses, regional Australian survey, **52**; (L), **901**
Spleen studies in case of polycythaemia rubra vera associated with

hairy cell leukaemia, **1312**
Sputum cytodiagnosis problems in alveolar-cell carcinoma, **1370**
Staphylococci and micrococci, identification of, evaluation of API Staph micromethod gallery for, **650**
Steatosis and cirrhosis, alcoholic, hepatitis B and A virus antibodies in, **693**
Sterilisation. *See* Decontamination
Steroid sulphatase deficiency, fetoplacental, antenatal diagnosis of, case report and literature survey, **1236**
Stomatitis induced by dentures, frequency of *Candida albicans* serotypes in patients with, comparison with normal denture wearers, **888**
Streptococci, group B, faecal carriage of (L), **1296**
——, β-haemolytic, grouping by agglutination, improved Streptex kit for, evaluation of, **719**
——, identification of, API-20 STREP system for, evaluation of, **468**
Streptococcus bovis septicaemia, recurrent, antibiotic management of case of, value of minimum bactericidal concentration in, **879**
—— *milleri* isolation with API-20 STREP, evaluation of (L), **1297**
Sulphomucins, demonstration of, orcein staining for (L), **366**
Suprapubic catheterisation, isolation of *Pseudomonas fluorescens* after (L), **581**
Swab transport method for aerobic and anaerobic bacteriology, **555**
Swabs and swab-transport media kits in isolation of upper respiratory bacteria, evaluation of, **223**
Synovial fluid lactic acid measurement in diagnosis and management of septic arthritis, **390**
—— membranes in haemophilia, rheumatoid arthritis and other rheumatic disorders, anticoagulant antibodies in, **673**
Syphilis antibodies, screening system in blood transfusion centre for, modification using miniaturised *Treponema pallidum* haemagglutination assay, **1349**
——, primary, early, serological detection of, comparison of TPHA with cardiolipin test for (L), **1394**

T and B cells in effusions as markers for non-Hodgkin's lymphoma, **1216**
—— cells, chronic lymphocytic leukaemia originating from, parallel tubular arrays in, lysosomal localisation of, **167**
Tendon sheath, fibroma of, **842**
Test request form in clinical biochemistry, requirements for, **986**
Tetanus toxoid, antibodies to, detection of, comparison of direct haemagglutination method with radioimmunoassay for, **1138**
—— ——, latex coated with, in manual screening for immune antitetanus antibodies, **899**
Tetracycline labelling *in vivo* and *in vitro* in demonstration of calcification fronts in chronic renal failure, **1278**
β-Thalassaemia major and iron overload, serum ferritin levels in, effect of ascorbic acid deficiency, **487**
6-Thioguanine as cause of toxic veno-occlusive disease of liver, **1086**
Thrombi, platelet, histological demonstration with double silver impregnation argyrophil stain, **1032**
Thrombocytopenia, myocardial haemorrhage with dyspnoea and arrhythmia in case of, **858**
β-Thromboglobulin and platelet factor 4 in megakaryocytes and platelets, immunological localisation of, **1227**
Thymolipoma, subcutaneous mixed tumour with adipose, fibroblastic and epithelial components (thymolipoma?), case of, **1074**
Thyroiditis, Hashimoto's, hypothyroidism in, somatostatin as paracrine contribution to, **764**
Ticlopidine for platelet inhibition in atherosclerotic intermittent claudication, trial of, **740**
Tissue plasminogen activator, quantitative assay method for, **980**
Tomography, computed, lung images in, pathological evaluation of, **536**
Toxoplasma gondii, antibodies to, detection in sera, comparative study of 3 tests (Toxotest-MT latex agglutination test, dye test, indirect haemagglutination test), **228**
Toxoplasmic lymphadenopathy, detection of antitoxoplasma IgM in, ELISA and antibody class capture for, **892**
Transplantation, bone marrow, ratio of blood-and marrow-derived cells in, **492**
——, renal, cytomegalovirus and herpes simplex virus disease after, prospective study, **1190**
——, ——, glycosylated haemoglobin levels after, comparison with levels in chronic renal failure, **737**
——, ——, neuropathological and general necropsy findings in 24 patients, **31**
Treponema pallidum haemagglutination assay, miniaturised, in modification of screening system for antisyphilis antibodies in blood transfusion centre, **1349**
—— —— —— for serological detection of early primary syphilis, comparison with cardiolipin test (L), **1394**
Trimethoprim, urinary pathogen resistance to, in Finland (L), **117**
Trypsin, immunoreactive, and pancreatic isoamylase in serum, measurement of, diagnostic value in cystic fibrosis, comparison of, **547**
Tubular arrays, parallel, in chronic lymphocytic leukaemia of T cell origin, lysosomal localisation of, **167**
Tumour, mixed, subcutaneous, with adipose, fibroblastic and epithelial components (thymolipoma?), case of, **1074**
Tumours, fatty, of uterus, **1380**
——, metastatic process, review of, **1041**
——, monoclonal antibodies to, review of, **369**
—— of bladder, low grade and high grade, morphometric analysis of urothelial cells in voided urine in, **1063**
—— of salivary glands, tyrosine crystals in (L), **120**
——, ovarian, of Wolffian or allied nature, **526**
——, Wilms', and renal dysplasia, **1069**
Tyrosine crystals in salivary gland tumours (L), **120**

Ulcer, rectal, solitary, syndrome of, and non-specific proctitis, morphological and mucus secretion criteria for differential diagnosis of, **26**
Ureaplasma urealyticum strains, serological characterisation by ELISA, **439**
Urinary cyclic GMP, levels in cancer and other conditions and potential as marker for cancer treatment, **800**
—— cytology in patients with calculi, **350**
—— hydroxyproline: creatinine ratio, fasting, measurement in normal adults and variation with age and sex, **807**
—— pathogens, resistance to trimethoprim in Finland (L), **117**
—— porphyrins, separation and quantification of, method for, **1232**
Urothelial cells in voided urine in low grade and high grade bladder tumours, morphometric analysis of, **1063**
Uterus, fatty tumours of, **1380**

Vaginitis, non-specific, *Gardnerella vaginalis* isolation in, comparison of culture medium with antibiotics and microscopy for, **550**
Varicella zoster virus IgA antibodies, determination by immunoperoxidase assay, **645**
Vascular disease, systemic or local, early detection of (L), **365**
Velvet pad surface sampling of anaerobic and aerobic bacteria, evaluation with *in vitro* laboratory model, **1356**
Veno-occlusive disease of liver, toxic, 6-thioguanine as cause of, **1086**
Vials, glass and plastic, weighing of, errors with single-pan balance (L), **477**
Virus infections, diagnosis by indirect immunofluorescent antibody test, FITC-protein A replacement of fluorescein-conjugated antigammaglobulins in, **472**

Vitamin B_{12} radioisotopic assay using intrinsic factor preparation with R-proteins blocked by vitamin B_{12} analogues, assessment of, **1110**

Vulvar lichen sclerosus et atrophicus, localised immunological damage in, evidence of (L), **1395**

Weighing of glass and plastic vials, errors with single-pan balance (L), **477**

Weight and height, effect on *in vivo* recovery of transfused factor VIII C in adolescent haemophiliacs, **289**

White cells. *See* Leucocytes

Wilms' tumour and renal dysplasia, **1069**

Word processor in histopathology laboratory, facilities available and practical use, **151**; (L), **1034**

Xanthomatous skin eruption, acute myelomonocytic leukaemia presenting as, case of, **1200**

Yolk sac antigens, formolised, in indirect fluorescent antibody test for diagnosis of *Legionella pneumophila* infections, **211**; *Erratum*, **692**

——— ——— ———, ———, ——— ——— ——— ——— ——— ——— for early diagnosis of Legionnaires' disease due to *Legionella pneumophila* serogroup 1 (L), **791**
